Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,3,4 rejected under 35 U.S.C. 103(a) as being unpatentable over Towers 6,099,060 in view of Hochman 3,739,919. Towers teaches a Bungee cord carrier capable of holding bungee cords of a variety of lengths. Hochman teaches a tube 11 having a plurality of attachment openings 12 capable of receiving a hook. To mount bungee cords of Towers upon the tubular support of Hochman for the purpose of easy access of the cords would have been obvious for one having ordinary skill in the art at the time of the invention. Because the openings 12 are relatively small, the bungee cords are constrained from motion relative to the tube 11.

Claim 5-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Towers in view of Hochman as described above and further in view of Seyforth 2,868,386. The Towers in view of Hochman combination teaches the device absent an axle bracket. Seyforth teaches a tubular display rack having an axle bracket 15 to facilitate rotation. To provide the combination with rotation means as taught by Seyforth to provide rotation for the retrieval of the stored items would have been obvious for one having ordinary skill in the art at the time of the invention. Note that the Seyforth device can be supported on a horizontal surface, on a vertical surface or hung from a ceiling. The method claimed is obvious for one having ordinary skill in the art at the time of the invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Similar storage devices are illustrated by Schooley 5,139,208; Dunnavant, Jr. 5,845,787; Elander 6,886,796.
